Are you becoming eligible for Medicare soon?

What PAP users need to know.

You will need to complete the following *after you become eligible for Medicare* in order for your Medicare plan to cover their portion for PAP equipment and supplies:

- You will need to visit your medical provider to discuss your need for PAP therapy.
- Your medical provider will have to send a new prescription for PAP supplies to your home medical equipment provider.

Your home medical equipment provider will need both signed office notes from your provider visit and a detailed prescription on hand before you will be able to obtain supplies.

Please Note: *This is a Medicare guideline that ALL home medical equipment providers are required to follow in order to bill for equipment/ supplies for a Medicare beneficiary.*

Are you becoming eligible for Medicare soon?

What OXYGEN users need to know.

You will need to complete the following *after you become eligible for Medicare* in order for your Medicare plan to cover their portion for oxygen equipment and supplies:

- You will need to visit your medical provider to discuss your need for oxygen therapy.
- You may need new testing to qualify per Medicare guidelines to prove need for oxygen (HME will alert you if new testing is needed).
- Your medical provider will have to send a new prescription for oxygen equipment & supplies to your home medical equipment provider.

Your home medical equipment provider will need both signed office notes from your provider visit and a detailed prescription on hand before you will be able to obtain supplies.

Please Note: *This is a Medicare guideline that ALL home medical equipment providers are required to follow in order to bill for equipment/ supplies for a Medicare beneficiary.*
